

Grass Seed

Crested Wheat Grass:

Drought Tolerant perennial bunchgrass, good soil stabilization, good palatability.
13-24" tall

Streambank Wheatgrass:

Cool season perennial, sod former, drought tolerant, tolerates alkaline soil, more productive heavier soils.
8-15"

Sheep Fescue:

Long lived perennial bunch grass, developed for low maintenance very drought tolerant.
12-14" tall.

Smooth Brome Grass:

Moderately drought tolerant, fast germination, vigorous sod, starts in early spring, abundant late summer and fall regrowth.
13-24"

Orchard Grass:

Cool season, long lived perennial, sod former, VERY drought tolerant, greens up early and remains green longer.
13-24"

Bonsai Fescue:

Very drought tolerant, deep fibrous roots system, sod forming great for homes, school and athletic fields.

Dwarf Fescue Blend 'Triple Play':

Densely tufted cool season grass, long lived perennials, bunchgrass, drought tolerant, dense fibrous root systems, good in all soil textures, sun/ part shade.

Low Maintenance Lawn Blend:

Sheep Fescue, Streambank Wheat Grass, Crested Wheat Grass. Adequate moisture 1st season will stay green with natural moisture for many seasons to come.
