

Post Installation Guidelines:

Irrigation system:

Drip and spray irrigation systems both need to be winterized, "blown out" every fall. If not done, pipes can freeze and burst. Call Park City Nursery to schedule winterization and turned on in the spring.

Plant Material:

Prune back all the perennials at least 5-6" above the ground in the fall.

Prune dead/dieing branches of shrubs and trees as needed.

Bulbs:

Bulb planting in the fall.

Remember that you live where deer roam, they love certain bulbs.

Mulch product:

Touch up soil pep areas every year. This prevents the weeds from penetrating. 3" depth is the

Lawn area:

Mow should be done once a week. Mulch clippings back into the lawn.

Gravel areas:

Touch up 2" gravel areas when needed.

Fertilizing:

When at all possible try to use an organic fertilizer.
